

# CAMLOCKS

Camlocks (also called Cam and groove coupling) are a Hose coupling used to rapidly connect and disconnect fittings on piping or hose. They are available in a variety of sizes, configurations and materials.

At HDS we carry NPT female threaded 316 SS grade Male (Type A) and female (Type D) camlocks, dust plugs and dust caps as standard with Nitrile seals, while other configurations and materials available on request.

## Options include:

- Locking arms
- PTFE Encapsulated seals
- Viton Seals
- 1 Piece flanged camlocks
- Male thread termination (Type B and F)
- Hose tail termination (Type C and E)
- Male/Male camlock joiners
- BSP threads
- Additional cam arms (3 or 4)
- Aluminium, FR polypropylene or bronze construction
- Dry disconnect valved camlocks (Kamvalok)

## Sizes Available:

- 1/2" to 6" in Bronze
- 1/2" to 8" in Aluminium and Stainless Steel
- 1/2" to 3" in Fibreglass Reinforced Polypropylene
